Digital Art History Grant Program

The Digital Art History Program is intended to foster new forms of research and collaboration and new approaches to teaching and learning. Support may be offered for the digitization of important visual resources (especially art history photographic archives) in the area of pre-modern European art history; of primary textual sources (especially the literary and documentary sources of European art history); for promising initiatives in online publishing; and for innovative experiments in the field of digital art history. Please note that this grant program does not typically support the digitization of museum object collections.

Grants are awarded to non-profit institutions with 501(c)3 status based in the United States, including supporting foundations of European institutions.

These are competitive grants. Please see Past Grants and Annual Reports on the Kress website for past awards and typical levels of funding.
